

KANISHKA SAXENA

WEB DEVELOPER | AI ENGINEER

+91 90279 43523

kanishka.saxena255@gmail.com

CAREER OBJECTIVE

Passionate app and web developer skilled in Java, React, Dart and mobile application development. Experienced in building user-friendly, efficient apps with strong problem-solving abilities. Focused on clean UI, performance optimization, and delivering scalable solutions while continuously learning new technologies to enhance development skills.

EDUCATION

B.Tech CSE | 2024-2028

RBMI College, Bareilly

12th PCM | 2023-2024

Harrow School, Bareilly

PROJECTS

Real-Time Bus Tracking System

React, FastAPI, Leaflet, Tailwind | 2025 - 2026

- Architected a real-time location tracking system supporting continuous GPS updates for multiple users
- Designed and implemented role-based access (Admin, Driver, User) with dedicated dashboards
- Built RESTful APIs and frontend integration to handle live data streams with low latency

Crop Disease Detection Tool

React, FastAPI, Tailwind, MySQL, TensorFlow & Keras, Python, CNN | 2026 - 2026

- Architected an AI-powered crop disease detection platform utilizing TensorFlow and Keras to analyze leaf scans and deliver real-time diagnostic and cure recommendations.
- Developed and integrated a custom CNN model (deployed via a .h5 file) to classify agricultural anomalies with optimized image preprocessing pipelines.
- Designed a comprehensive user dashboard featuring historical scan logs, automated disease analysis, and a real-time weather tracking page utilizing external API integration.

SKILLS

- | | | |
|----------------|--------------|-----------|
| • React | • Python | • MYSQL |
| • Tailwind CSS | • JavaScript | • FastAPI |
| • Git | • GitHub | • Figma |
